before the seminar, 3:00 – 3:30 pm**

Abstract

A design based on the 2025 Master Plan for the improvements of the Kahului Harbor will be presented at a public hearing style seminar. The seminar will be conducted as if the proposed design was being reviewed at a public hearing and may include comments and questions from the citizens point of view. The presentation will include a discussion of all three phases of design: (1) the development of the design parameters, (2) the development and evaluation of harbor design concepts, and (3) the detailed design and evaluation of the selected design concept.
